18/10/26

① Three Process arrive at time 0:

Process	Burst time
P1	5
P2	3
P3	8

Activity:
Process Scheduling

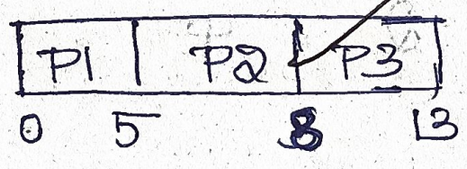

using FCFS, the average waiting time is.

Sol

Process	Burst time	waiting Time
P1	5	0
P2	3	5
P3	8	8

Average = $\frac{0+5+8}{3}$

$= \frac{13}{3} = 4.333$

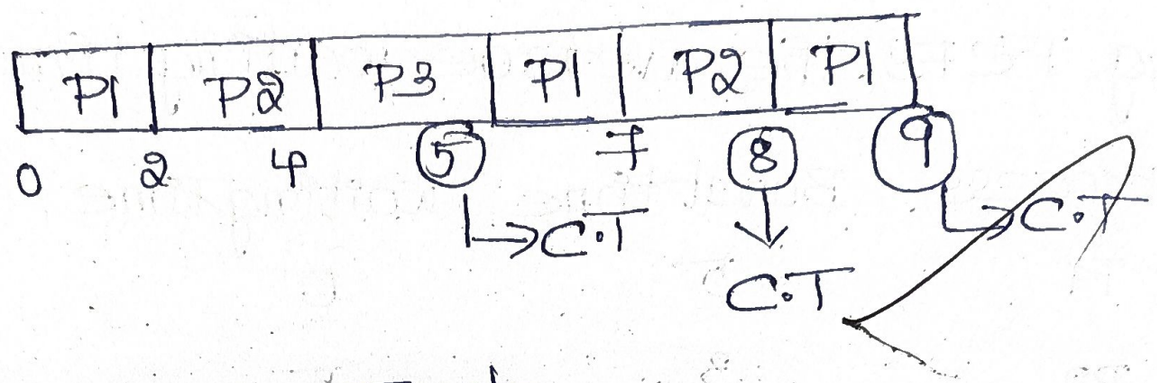

② consider Round Robin with time quantum = 2

Process	Burst time
P1	5
P2	3
P3	1

All arrive at time 0. Which process comple tes first

Sol

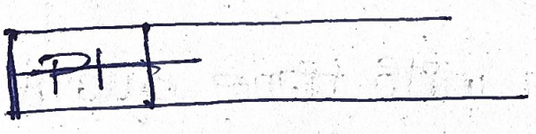

Process	A.T	B.T	C.T
P1	0	5	9
P2	0	3	8
P3	0	1	5

P3 completes first

(3)

Process	A.T	BT	WT	TAT
P1	0	5	0	5
P2	2	3	3	6
P3	4	2	4	6

TAT = WT + BT

Average = $\frac{5+6+6}{3}$

$= \frac{17}{3}$

$= 5.666$

④

Process	Burst Time	WT
P1	7ms	9
P2	4ms	1
P3	1ms	0
P4	4ms	5

SJF

P3 → P2 → P4 → P1

Average WT = $\frac{9+1+0+5}{4}$

$= \frac{15}{4} = 3.75$

⑤

Process	BT	AT	Priority	WT
P1	5	0	3	7
P2	3	0	1	0
P3	4	0	2	3

P2 → P3 → P1

Average WT = $\frac{7+0+3}{3}$

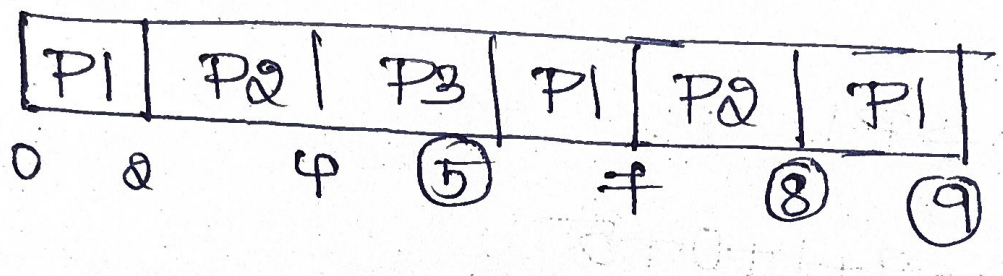

$= \frac{10}{3}$

$= 3.333.$

⑥

Process	AT	BT	C.T
P1	0	5	9
P2	0	3	8
P3	0	1	5

Time quantum = 2ms

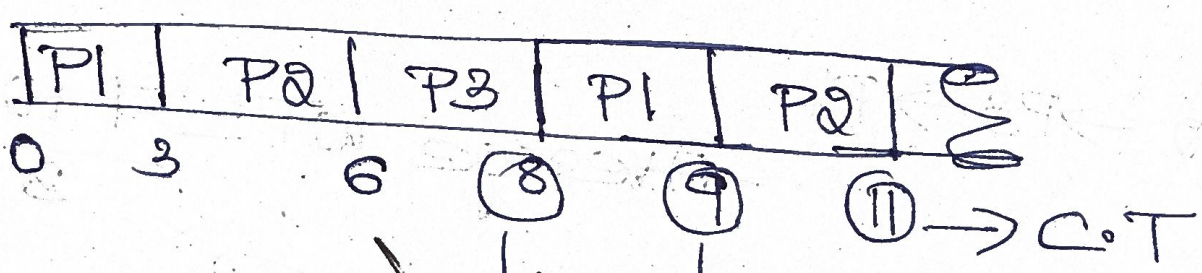

Completion Time of P2 = 8ms

⑦

Process	BT	AT	C.T	TAT	WT
P1	4	0	9	9	5
P2	5	0	11	11	6
P3	2	0	8	8	6

Time quantum = 3ms
